1. Changes
    a. Increase opacity on the header nav slightly to make it contrast less with the background
    b. Make the font closer in color to whitish grey to increase legibility and contrast it with the background colors
    c. Move the logo icon to the left side of the header nav and space out the three navigation buttons evenly with description being centered
    d. Change the description button to read as *equipment*
    e. Get rid of or greatly thin out the line dividing the footer and the main body of the page
    f. Move the paragraph describing kendo in the first page lower
    g. Equipment page
        i. Images larger and have only the title showing
        ii. When clicked, have the text display via drop down
        iii. Remove the image border and keep the aesthetic of the fading gradient that was in the homepage.
    h. Implement side stationary navigation scheme for history/kendo page
